AMJAD KHAN

Full Stack Developer

Bareilly, Uttar Pradesh, India — amjadkhann.tech@gmail.com — +91-9756859054
LinkedIn — GitHub — LeetCode Profile

Summary

B.Tech Computer Science Engineer and MERN Full stack developer with a **2-month Full Stack internship**. Built **two full-stack projects** using React.js, Next.js, Node.js, Express.js, and MongoDB, with JWT authentication and **REST APIs**. Solved **150+ DSA** problems on LeetCode and GFG.

SKILLS

Languages:- JavaScript, **TypeScript**, Java
Problem Solving:- Data Structures & Algorithms (DSA)
Frontend:- React.js, Next.js, **Redux Toolkit**, HTML5, CSS3, Tailwind CSS, **Material UI**
Backend:- Node.js, Express.js, **RESTful APIs**, **JWT Authentication**, **Microservices**, **RabbitMQ**, Multer
Databases:- MongoDB, **Mongoose**
Tools:- Git, GitHub, **GitHub Actions**, Docker, **CI/CD**

EXPERIENCE

Full Stack Intern **June 2026 – August 2026**
Vitsoft Solutions Pvt. Ltd. – Bareilly, Uttar Pradesh

- Developed features for **MERN stack web applications** in an **agile** team, working across the **React.js** frontend and **Express.js** backend.
- Built responsive **React.js** interfaces and integrated them with **REST APIs** to fetch, display, and update server data.
- Implemented **Express.js** and **MongoDB** services with **CRUD operations**, **user authentication**, and **secured API endpoints**.
- Debugged and resolved frontend and API integration issues to keep client–server data flow working correctly.

PROJECTS

postBlogs – Social Blog Platform View Repository
Next.js 15 – React 19 – Redux Toolkit – Context API – Bootstrap 5 – Node.js – Express 5 – MongoDB – Multer – Bcrypt

- Built a **full-stack social blogging platform** with a **Next.js 15** frontend and an **Express 5 and MongoDB** REST API, where users can **create accounts, send friend requests, and connect** with each other.
- Implemented **secure authentication** with **Bcrypt** password hashing to protect user credentials.
- Developed a **media upload pipeline** using **Multer** and **RESTful APIs** to handle file uploads from the client to the server.
- Managed global application state with **Redux Toolkit** and **Context API**.

ReelApp – Short-Video Social Platform View Repository
React.js – TypeScript – Node.js – Express.js – MongoDB – RESTful APIs – JWT

- Built a full-stack **short-video** platform with a scroll-based **reel feed** and a responsive **React.js** interface for discovering and watching short-form content.
- Developed **REST APIs** with **Node.js, Express.js, and MongoDB**, securing routes with **JWT authentication** and handling video uploads through a dedicated **storage service**.
- Designed **Mongoose schemas** for users, videos, likes, and saves.

EDUCATION

B.Tech in Computer Science & Engineering **Expected 2027**
Shri Ram Murti Smarak College of Engineering & Technology, Bareilly

TECHNICAL ACHIEVEMENTS

- Solved **150+ DSA problems** on **LeetCode and GFG** to strengthen problem-solving skills and build a strong foundation in data structures and algorithms.
- Practiced **debugging** across frontend and backend applications by identifying, analyzing, and resolving **runtime, logic, API, and integration issues**.
